PACT Co., Ltd.

Turn Exhaust Gas from Waste into Value.

Atmospheric-Pressure Plasma × Catalyst

A new chemical reactor enabling decomposition, synthesis, and reforming.

Factory | Semiconductor | Livestock | Medical | Food

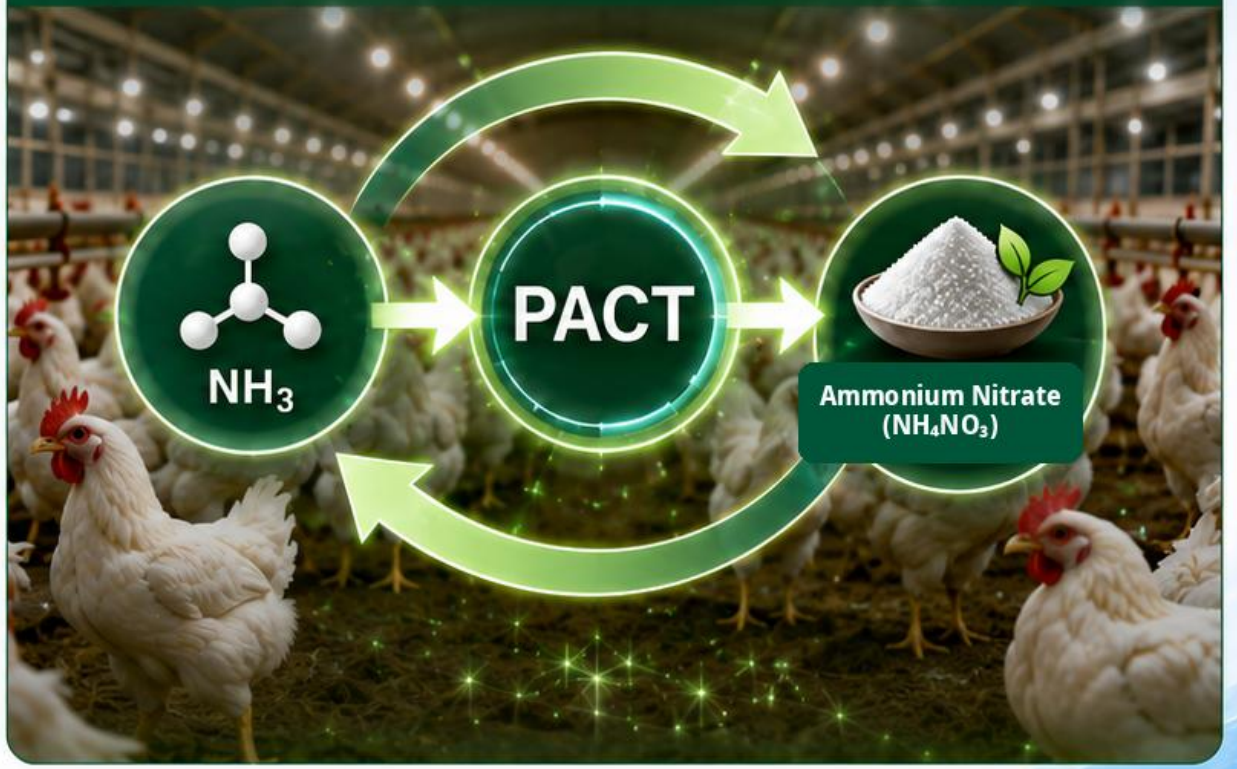

Expanding into factories, semiconductors, livestock, medical, and food sectors

From Treatment Cost to Value Creation.

Harmful Factory Gases → Valuable Resources

Poultry-House Ammonia → Fertilizer Components

Turn burdensome exhaust gases into valuable resources for the future.

Adaptable Forms for Every Application.

Potential applications in medical & healthcare fields.

Toward Virus & Bacteria Inactivation

Fan-Motor Type

Panel Type

Coil Type

Multi-Hole Type

Please visit our booth to see the equipment concept in person.
